**SAVE THE DATE— TRADE SHOW**  
*September 27, 2023*

SOOGA's Annual Trade show is scheduled for Wednesday, September 27th, 2023 at the Elisabeth Sugden Broughton's Community Building. (see page 22 for more information)

**SOOGA Annual Boat Ride**

SOOGA held their 3rd Annual Industry Appreciation Dinner and Boat ride on July 28th and was well attended. The weather was beautiful and music and laughter filled the boat. We would like to thank everyone for coming and enjoying the evening with us. We couldn't have these events without the sponsorships. (See page 21 for more details)

## THE CROW'S NEST

It is with incredible sadness that I write this while reflecting on the loss of Bill Mitton. He was one of the true great oil field men that bridged the knowledge of the past to overcome the challenges of the present. He was tough and expected a lot, but he was also always quick with a smile and always ready to help in any way he could. A lot of us recently visited with Bill on the SOOGA boat ride which is a great final memory. He loved his country and his industry; although he was very concerned with the direction that both were heading. I will always cherish how Bill ended texts between us, usually with the “fist bump” emoji and the American flag emoji. Although I never asked him, to me, this meant “I have your back” and we live in a great country. The last texts we exchanged ended with me sending the American Flag emoji and he immediately replied with two American flag emoji’s. He was a friend, good guy, and a great hand. His passing is a tremendous loss to the industry. In reflection of the past, I’m reminded SOOGA is celebrating its 45<sup>th</sup> anniversary this year. While we have chosen to save a big celebration for the 50<sup>th</sup> anniversary, I recall the 40<sup>th</sup> anniversary celebration (a touching tribute video can still be found on the SOOGA website, [sooga.org](http://sooga.org)) and the SOOGA President at that time was my wife, Christy Chavez. To draw the line even further back, her father, Carl Heinrich was a founding member of SOOGA, and was the first inductee into the SOOGA Hall of Fame. We should always embrace the past, remember where the industry came from, and those who led the way. These changing and trying times are difficult on us, but we need to remember those who came before us persevered through their own trying times. We greatly miss those we have lost, but we will remember what they taught us. We will keep this industry, and this nation, strong and moving in the right direction. That’s what this industry does.

-Brian Chavez  
SOOGA President

## 2023 SOOGA Tentative Calendar of Events

### Spring Membership Meeting

April 20th, 2023  
Elisabeth Sugden Broughton  
Community Building  
Marietta, OH 45750

### Spring Golf Outing

May 12th, 2023  
Lakeside Golf Course  
18850 State Route 60  
Beverly, OH 45715

### Spring Clay Shoot

June 22, 2023  
Briar Rabbit  
2949 Granger Hill Rd.  
Zanesville, OH. 43701

### Annual Industry Boat Ride

July 28th, 2023  
Valley Gem  
601 Front Street  
Marietta, OH

### Fall Golf Outing

August 25th, 2023  
Oxbow Golf Course  
500 St. Andrews Blvd  
Belpre, OH 45714

### Annual Trade Show

September 27th, 2023  
Elisabeth Sugden Broughton  
Community Building  
639 OH-821  
Marietta, OH 45750

### Fall Clay Shoot

October 20th, 2023  
Marietta Gun Club  
1385 Gunclub Rd,  
Whipple, Oh 45788

### November 2023

Gun Giveaway

**Summary**

Working gas in storage was 3,001 Bcf as of Friday, July 28, 2023, according to EIA estimates. This represents a net increase of 14 Bcf from the previous week. Stocks were 550 Bcf higher than last year at this time and 322 Bcf above the five-year average of 2,679 Bcf. At 3,001 Bcf, total working gas is within the five-year historical range.

**Working gas in underground storage compared with the 5-year maximum and minimum**

Data source: U.S. Energy Information Administration

**Prices/Supply/Demand**

- **Supply:** According to data from S&P Global Commodity Insights, the average total supply of natural gas rose by 0.8% (0.9 Bcf/d) compared with the previous report week. Dry natural gas production grew by 0.8% (0.8 Bcf/d) to average 102.5 Bcf/d this week, and average net imports from Canada increased by 1.2% (0.1 Bcf/d) from last week.
- **Demand:** Total U.S. consumption of natural gas rose by 0.9% (0.7 Bcf/d) compared with the previous report week to average 76.6 Bcf/d, according to data from S&P Global Commodity Insights. Natural gas consumed for power generation rose by 1.2% (0.5 Bcf/d) week over week. Industrial sector consumption decreased by 0.3% (0.1 Bcf/d), and residential and commercial sector consumption increased by 2.3% (0.2 Bcf/d). Natural gas exports to Mexico decreased by 2.6% (0.2 Bcf/d). Natural gas deliveries to U.S. LNG export facilities (LNG pipeline receipts) averaged 12.2 Bcf/d, or 0.3 Bcf/d lower than last week.

(continued to page 6)

(continued from page 5)

### Pricing:

- **Henry Hub spot price:** The Henry Hub spot price fell 18 cents from \$2.61 per million British thermal units (MMBtu) last Wednesday to \$2.43/MMBtu yesterday.
- **Henry Hub futures prices:** The August 2023 NYMEX contract expired Thursday at \$2.492/MMBtu, down 17 cents from last Wednesday. The September 2023 NYMEX contract price decreased to \$2.477/MMBtu, down 22 cents from last Wednesday to yesterday. The price of the 12-month strip averaging September 2023 through August 2024 futures contracts declined 16 cents to \$3.164/MMBtu.
- **Select regional spot prices:** Natural gas spot prices fell at most major pricing hubs this report week (Wednesday, July 26 to Wednesday, August 2). However, prices remained the same or rose at some locations in the Rockies and the West. Price changes this week ranged from a drop of \$4.75/MMBtu at Algonquin Citygate to an increase of \$0.16/MMBtu at Malin.
  - The price at the Waha Hub in West Texas, which is located near Permian Basin production activities, fell 19 cents this report week, from \$2.27/MMBtu last Wednesday to \$2.08/MMBtu yesterday. The Waha Hub traded 35 cents below the Henry Hub price yesterday, compared with last Wednesday when it traded 34 cents below the Henry Hub price. Prices were volatile in Texas this week, as pipeline maintenance disrupted natural gas flows from West Texas. Kinder Morgan declared a [force majeure](#) on the Permian Highway Pipeline on July 27 after an unspecified incident occurred and pipeline capacity was reduced to zero. The price at the Waha hub decreased to an intraweek low of -\$0.52/MMBtu on July 28.
  - In the Northeast, prices fell at major pricing hubs as average temperatures fell from recent highs and pipeline capacity increased slightly as a result of completed pipeline maintenance. In New England, at the Algonquin Citygate, which serves [Boston-area consumers](#), the price fell \$4.75/MMBtu, from \$6.31/MMBtu last Wednesday to \$1.56/MMBtu yesterday. The operational capacity reductions on the Algonquin Gas Transmission system eased this week, according to a previously published [notice](#). Temperatures across the region were lower this week, and consumption in the electric power sector declined by 2% (0.3 billion cubic feet per day [Bcf/d]), according to data from S&P Global Commodity Insights. The [Boston Area](#) had 8 fewer cooling [degree days](#) (CDDs) this week compared with the previous week, totaling 64 CDDs this report week.

## Premium Service for a Premium Product

Whether buying or transporting crude, Ergon Oil Purchasing offers flexible logistics to move your product from wellhead to market. Through Ergon's refineries, network of terminals, barge and trucking fleets, we understand what drives the crude oil industry.

## Marietta Times: Letter to the Editor

### **Oil and gas boom has not fizzled; new industries will continue to be attracted to Shale Crescent region:**

I am responding to the Marietta Times “Our Opinion” column published on Monday, Aug. 28 regarding the Ohio River Valley Institute’s (ORVI) totally inaccurate conclusion that the oil and gas boom has fizzled. The readers’ first tip that the report by ORVI may be biased against the oil and gas industry lies in their reference to the Shale Crescent region of Ohio, West Virginia and Pennsylvania as “Frackalachia.” ORVI failed to use the most accurate data on oil and gas production that can be readily obtained from the Ohio Department of Natural Resources website (<https://ohiodnr.gov/static/documents/oil-gas/resources/2021-O%26G-Annual.pdf>). Similar websites are available in West Virginia and Pennsylvania where the oil and gas boom has not fizzled out.

If the Times editorial staff had done a little homework and checked with local experts or the Ohio Department of Natural Resources, which collects quarterly data on oil and gas production and publishes quarterly and annual summaries of this data, they would have observed that oil production increased from 4,974,000 barrels in 2012, to 18,999,000 barrels in 2021. Similarly, gas production increased from 86,700,000 Mcf in 2012 to 2,259,425,000 Mcf in 2021.

These numbers are down slightly from 2018, the peak year for oil and gas production, but one can hardly say the industry has fizzled out. With oil selling at \$60 to \$80 a barrel and gas selling for \$1.60 to \$3.40 per Mcf during this same period of time, it is easy to see how cash flow from production increased from under \$1 billion in 2012 to almost \$9 billion in 2021. With the landowners’ royalty share of these numbers averaging around 18%, it is pretty clear that they, along with the companies and the State of Ohio, have benefitted significantly from the oil and gas boom in Ohio. Note that this information was obtained from the 2021 Annual Report. The 2022 Annual Report has not yet been loaded on the ODNR website.

The Capital Journal reported (based on the ORVI report) that gas production deteriorated since 2008 and growth has gone from meager gains in 2008 to an absolute decline. Nothing could be further from the truth. The fact that the Shale Crescent region is so richly blessed with an abundant supply of natural gas, new industries will continue to be attracted to the region where cheap energy abounds.

ROBERT W. CHASE, PH.D., P.E.

**H2S - TOXIC GAS IN OIL & GAS DRILLING**

Hydrogen Sulfide gas can be one of the most deadly hazards in the oil and gas industry. It is important that workers in the oil and gas industry are very aware of its lethal properties. Hydrogen sulfide is a highly toxic, colorless, combustible gas. It is heavier than air and has the unmistakable odor of rotten eggs. Loss of consciousness can occur within seconds when exposed to a high concentration of H2S gas. The correct way of determining the amount of H2S present is by testing for the gas. If H2S is suspected, the concentration must be determined before any persons are allowed in the area. If H2S gas is detected, the following procedures should be followed: The drilling rig must be equipped with H2S monitors, along with audible and visual alarms. A calibration must be performed daily or as instructed by the manufacturer. Wind direction indicators should be installed in locations that are visible from the rig floor, shale shakers, and mud tanks. At least one blower must be located on the rig floor; but blowers are also highly recommended at the shale shaker, mud tank and cellar floor. H2S warning signs must be located no more than ¼ mile from the well. At least two designated safe briefing areas with at least two sets of self-contained breathing apparatus (SCBA's) must be located in each area. Emergency escape breathing units must be kept on the rig floor, monkey board, shale shaker and mud tank. All employees must have completed an H2S training program. Extra caution must be used around low lying areas such as cellars, ditches, etc. H2S is heavier than air and will collect in these areas. All personnel must avoid entering any confined space including: tanks, vessels, or other enclosed area unless they have received confined space entry training, they have a permit for entry when required, and the space has been tested and found safe for entry. Safety Resources Company of Ohio, Inc.

# SOOGA's Energy Insights

Hosted by Johnny Wharff  
Saturdays @ 9 A.M.

This program on the radio is brought to you by the Southeastern Ohio Oil and Gas Association and can be heard every Saturday at 9 A.M. Listen to the program on any of these five stations:

Previous episodes can be found on SOOGA.org or by searching for Energy Insights WMOA on YouTube. SOOGA's Energy Insights recently traveled to Washington DC to get a perspective of the industry on a federal level. Please listen to episodes from members of the Energy and Commerce Committee as well as the person in charge of the Environmental Protection Agency (EPA) Administrator Andrew Wheeler.

## OBITUARIES

William J. Mitton, 63, of Thornville, died suddenly Monday August 28, 2023 at Grant Medical Center. He was born on June 11, 1960 in Newark, Ohio. He dedicated his whole life to the oil and gas industry. He was a part owner of Cemenco Triple B Services, was Vice President of Operations at Knox Energy. He was inducted into the Ohio Oil & Gas Association Hall of Fame in 2022.

He is survived by his father Joseph William Mitton. Four children Joe (Audra) Mitton, Tiffany (David) Ryan, Latasha Mitton, and Justin (Cierra) Mitton. Grandchildren Tristan (Wyatt) Factor, Ryan Snack, Ethan Mitton, Tyler Guerin, Ayanna King, Liyah King, Eli Mitton, Gunner Ryan, Jaxon Mitton, Carter Mitton. Great-grandchildren Elijah Taylor, Elizabeth Johnston, and Silas Factor. Two brothers Steve (Michelle) Mitton and Tim (Jackie) Mitton. One sister Lori (Greg) Misner. Several cousins, nieces, and nephews, great-nieces and great-

nephews.

He was preceded in death by his wife Brenda Mitton. His mother Donna Mitton.

Private graveside services will be held at Rose Hill Cemetery. A celebration of life will be held on Wednesday September 6, 2023 beginning at 2:00 p.m. at the Muskingum County Fairgrounds.

Bill was an organ and tissue donor. Memorial contributions may be made to the Wounded Warrior Project.
