SAVE THE DATE - April 11, 2024

SOOGA Annual Membership Meeting

The SOOGA Membership Meeting will be held on April 11th, 2024 at the Elizabeth Sugden Broughton's Community Building; 2167 State Route 821, Marietta, Ohio 45750. A tentative agenda of the days events can be found on page 8.

2024 Southeastern Ohio Oil and Gas Association

Board of Trustees Election

The 2024 Board of trustees election will be held at the Spring Membership Meeting On April 11th, 2024. This years candidates are: Eddy Grenert, Leroy Baker, Bob Matthey and Ethan Bonnette. Their bios can be found on page 14 and 15. The official ballot is on page 16. You can vote either by mail, email or in person at the Membership Meeting on April 11th. If voting by mail, please send ballot to; 2167 State Route 821, Suite A, Marietta, Ohio 45750, or email to mail@sooga.org.

SOOGA BYLAWS

The SOOGA Bylaws have been updated and emailed to all members, you can also find it on our website at www.sooga.org. The Bylaws will be voted on at the Spring Membership Meeting April 11th, 2024. This is important to the SOOGA Membership and your attendance is needed.

THE CROW'S NEST

My name is, Winnie Sinnett, the newly appointed SOOGA President.

I would like to start off by saying, on behalf of SOOGA and myself, thank

you to Brian Chavez for his dedication to SOOGA and the oil and gas industry. We wish
him the best of luck with the newly appointed position as a Ohio State Senator.

Now a little bit about my background. I was raised in Holmes County, Ohio where I attended West Holmes High School graduating in 1984. The day after graduating I went to work for the WH Patten Drilling Co. doing everything from throwing hay bales, to learning about roustabouts, and how to become a pumper. From there I went to work for Buckeye Oil Producing Co. in 1998 where I was a well tender in Holmes and Coshocton County. In 2003, I had the opportunity to transfer to Calhoun County, West Virginia. There I learned a lot about drilling Shale and Berea wells, as well drilling horizontal Berea wells. I'm still currently employed today as Supervisor of our West Virginia field operations.

Here at SOOGA we have been working on the schedule of events for the year, starting with the Annual Spring Membership Meeting on April 11th at Broughton's Community Building in Marietta, OH. We have a fine list of speakers with a lot of valuable information. Most importantly an update on the Methane Rule that will most likely effect everyone in the oil and gas industry, We will also have everyone's favorite, Dan Corcoran, with his legal update. Please be sure to mark your calendars for all of our planned 2024 events which can be found on page 3. Your show of support at our events is important. That's about all I have right now, I'm not really good at this type of stuff.

Until next time be safe out there!!!

Winnie Sinnett- President

(continued from page 4)

Summary

Working gas in storage was 2,584 Bcf as of Friday, February 2, 2024, according to EIA estimates. This represents a net decrease of 75 Bcf from the previous week. Stocks were 187 Bcf higher than last year at this time and 248 Bcf above the five-year average of 2,336 Bcf. At 2,584 Bcf, total working gas is within the five-year historical range.

Working gas in underground storage compared with the 5-year maximum and minimum

Data source: U.S. Energy Information Administration

Prices/Supply/Demand

- Supply: According to data from S&P Global Commodity Insights, the average total
 supply of natural gas rose by 0.8% (0.9 Bcf/d) compared with the previous report
 week. Dry natural gas production grew by 1.2% (1.2 Bcf/d) to average 104.4 Bcf/d,
 and average net imports from Canada decreased by 6.5% (0.4 Bcf/d) from last week.
- Demand: Total U.S. consumption of natural gas rose by 1.4% (1.2 Bcf/d) compared with the previous report week, according to data from S&P Global Commodity Insights. Residential and commercial sector consumption increased by 4.9% (1.7 Bcf/d) week over week. Natural gas consumed for power generation declined by 1.4% (0.5 Bcf/d), and industrial sector consumption was essentially unchanged. Natural gas exports to Mexico decreased 8.9% (0.5 Bcf/d), and natural gas deliveries to U.S. LNG export facilities (LNG pipeline receipts) averaged 13.3 Bcf/d, or 0.7 Bcf/d lower than last week.

(continued from page 5)

Pricing:

- Henry Hub spot price: The Henry Hub spot price fell 26 cents from \$2.23 per million British thermal units (MMBtu) last Wednesday to \$1.97/MMBtu yesterday, the lowest price since June 12, 2023.
- Henry Hub futures price: The price of the March 2024 NYMEX contract decreased 13.3 cents, from \$2.100/MMBtu last Wednesday to \$1.967/MMBtu yesterday. This is the lowest settlement price for the March 2024 contract since trading of this contract began 12 years ago. The price of the 12-month strip, averaging March 2024 through February 2025 futures contracts, declined 12.5 cents to \$2.641/MMBtu.
- **Select regional spot prices:** Natural gas spot prices fell at most locations this report week (Wednesday, January 31 to Wednesday, February 7) in line with the decline in the Henry Hub spot price. Price changes ranged from a decrease of \$1.01/MMBtu at Algonquin Citygate to an increase of \$0.44/MMBtu at Northwest Sumas.
 - Natural gas prices in the Northeast decreased from last Wednesday in anticipation of warmer weather moving into the region. At the Algonquin Citygate, which serves Boston-area consumers, the price went down \$1.01 from \$3.35/MMBtu last Wednesday to \$2.34/MMBtu yesterday. At the Transcontinental Pipeline Zone 6 (Transco Zone 6) trading point for New York City, the price decreased 27 cents from \$1.95/MMBtu last Wednesday to \$1.68/MMBtu vesterday. During the report week, the Algonquin Citygate price reached a weekly high of \$7.10/MMBtu last Friday and Transco Zone 6 reached a weekly high of \$2.66/MMBtu on Monday. Natural gas consumption increased because of cooler weather this week and relatively low natural gas prices for this time of year. Temperatures in the Boston Area averaged 35°F, resulting in 210 heating degree days (HDD), 8 more HDDs than last week. Similarly, temperatures in the New York-Central Park Area averaged 39°F, resulting in 178 HDDs, 19 more HDDs than last week. Natural gas consumption in the Northeast increased 9% (2.2 billion cubic feet per day [Bcf/d]), led by a 12% (1.5 Bcf/d) increase in residential and commercial sector consumption, according to data from S&P Global Commodity Insights.

The consumption of natural gas in the United States reached a new record on January 16, 2024. A record 141.5 Bcf was consumed on that day, beating the previous record set on December 23,2022

SAFETY CORNER

GEN HANDLEY

FEB 26, 2024

Falls are a Major Occupational Threat — How Do I Protect My People?

A fall at work can be more dangerous than it seems. A major misconception of common slips, trips and falls is that they cause the most harm from tall heights and upper levels. The reality is that workers are more likely to die from the injuries experienced from falls at lower levels, which increased almost 3 percent according to the latest numbers on <u>fatal occupational injuries</u>. This data also found that fatalities from slips, trips and falls increased nearly 2 percent in 2022.

This makes occupational fall injuries the second-highest cause of worker deaths behind transportation incidents and a top safety priority for safety managers across all industries. The biggest challenge in addressing the broad category of slips, trips and falls is mitigating the varying possible causes for a worker to slip, trip, fall and hurt themselves. Because a deadly slip can occur almost anywhere, they need a customized, comprehensive approach to safety hazard mitigation, requiring various safety measures and protocols in completely different ways.

The Threat of Falls at Work

This danger of falls is present in a range of circumstances that can be found in almost any sector or job. The <u>National Institute for Occupational Safety and</u> Health says fall incidents at work can frequently involve circumstances including:

● Slippery ● cluttered or unstable walking/working surfaces ● Unprotected edges Floor holes and wall openings ● Unsafely positioned ladders ● Misused fall protection

However, the potential risk for a fall hazard within the work environment can be more complicated than that, involving other factors such as <u>cold weather and temperatures</u>, additional PPE and equipment and improper footwear.

The Impact of Falls at Work

When an employee falls and hurts themselves at work, the consequences and required time off can broadly range from a sprained ankle to a major head injury. These injuries hurt not only the employees themselves, but their surrounding loved ones and coworkers, sometimes creating a lasting emotional impact on their lives.

It also impacts the company and its operations, requiring the time off needed to recuperate and remedy the problem so that it does not occur again and hurt more employees. According to the National Council on Compensation Insurance's (NCCI) Workers Compensation Statistical Plan database, falls or slips were the third most costly lost-time workers' compensation claims from 2020 to 2021, after motor vehicle crashes and burns.

What Employers Can Do

Thankfully, employers are not completely powerless to the many distinct, potential slips and falls hazards in their workplaces. The key is to remain organized and proactive, recognizing what these hazards are and staying ahead of them before they harm a person doing their job.

Regular Fall Hazard Assessments

In order to stay ahead of occupational fall hazards, it's key to assess them on a regular basis, documenting all existing as well as future dangers that could harm employees down the road. Fall hazards and risks can easily shift with changes in staff or weather. So make sure assessments are conducted consistently or as needed.

Ongoing Safety Training

One of the most effective methods to proactively make sure people can perform their work around fall hazards safely is through safety training. Determine the type of training according to whichever fall hazards have been identified and require the financial and time commitment for this level of safety education.

Regular Clearing of Walkways

This may be an obvious point. However, the walkways in work environments must be always cleared of clutter and tripping hazards like electrical cords. What isn't as obvious is committing to this practice and making it a habit within the workplace, incorporating it into daily tasks and routines.

Fall Protection Technology

In addition to safety practices, employees can be equipped with <u>fall detection apps</u> and wearables which can request immediate emergency help if the worker experiences an injury. In real time, fall protection devices will detect a dangerous impact and get help to the worker's location as quickly as possible.

Provide proper footwear

Employees can also be provided with <u>properly fitting footwear</u> that can grip the surfaces they are working on more effectively and comfortably. In some cases, specific PPE footwear may be required, however, this can also be determined in the fall hazard assessment.

Develop Fall Protection Plan

Overarching all of this can be a fall protection plan, which outlines all of the procedures and policies that can help employees reduce the number of fall hazards in the workplace. OSHA has developed a template for a <u>Fall Protection Plan</u> that "must be developed and evaluated on a site-by-site basis." Additionally, "it is recommended that builders discuss the written Fall Protection Plan with their OSHA Area Office prior to going on a jobsite."

Be Prepared

No matter what, fall hazards are going to exist in the workplace and on worksites. However, employees can be prepared for the hazards and aware that they exist as well as what can be done now to prevent someone from spraining a limb at work or much worse.

THE INSIDER Page 14

BOT ELECTION BIOGRAPHIES

ETHAN BONNETTE

Ethan is from Marietta, Washington County, Ohio and currently resides in Waterford, Washington County, Ohio. Ethan earned his Bachelor of Science in Natural Resources Management with a concentration in Land Management from Glenville State College in 2011. Ethan is married to Hannah, a teacher at Waterford Elementary, and they have an 11-year old daughter, Ryleigh.

Ethan has served as a Landman for Artex Oil Company since 2011 and Senior Landman since 2015. Ethan has experience in managing leasehold, lease/well acquisitions and divestitures, abstracting, division order analysis, and water transfer for hydraulic fracturing. Prior to assuming his current roles, Ethan worked for Artex Oil Company as a Roustabout and part-time Landman while attending college.

Ethan is a member of the American Association of Professional Landmen (AAPL), the Michael Late Benedum Chapter (MLBC) of the AAPL and a member of Southeastern Ohio Oil and Gas Association since 2015.

LEROY BAKER

Leroy graduated with an Associate degree in Petroleum Engineering from Glenville State College in May 1988. After college he began working for Term Energy Corporation, a small oil and gas operator producer in Harrisville, WV as the Operations Manager. In 2016 he became General Manager of Term Energy.

Leroy is a member of the Southeastern Ohio Oil and Gas Association, the Gas and Oil Association of WV, Inc (GO-WV) and the West Virginia Producers Issues Committee. Leroy lives near Harrisville, West Virginia, with his wife Susan of 33 years. His interests include being outdoors whether it's doing yardwork, bow hunting or fly fishing.

ROBERT (Bob) MATTHEY, JR.

Bob is an oil and gas producer in West Virginia and Ohio. Bob is Vice-President of Lippizan Petroleum and co-owner of Cemenco Services. Bob graduated from Glenville State University with a bachelor's in business, an emphasis in petroleum engineering. Bob is on the Board of Trustees for the Southeastern Ohio Oil and Gas Association; he is also a licensed professional auctioneer.

Bob is a member of Gas and Oil Association of WV, Inc. (GO-WV) and the West Virginia Commerce Committee.

(continued to page 15)

(continued from page 14)

EDDY GRENERT

Edward Grenert is a petroleum engineer for Buckeye Oil Producing, Co. and Buckeye West, LLC since 2022. Operations currently involves work in 4 different basins across 5 states in the U.S. Playing basketball and graduating from Marietta College in 2016, he started his professional career at Antero Resources. Working as a production engineer over their OH, Utica shale unconventional assets for 6 years. Specializing in production optimization included new well turn in lines, plunger lift, workovers, forecasting, budgeting, and planning. Eddy grew up and resides in Wooster, OH with his wife Abby and three daughters, Graysan (4), Ginnette (2) and Gabrielle (1 month). Spending time with family and friends, playing with his daughters, and being outdoors are a few of many hobbies they enjoy. Most weekends are spent on the swing set, in the woods, around a bonfire, or helping the girls learn a new activity. Most vacations include camping at state and national parks along with family beach trips.

UPDATES FOR WEST VIRGINIA

WV happenings- The following legislative bills are before both houses of the legislature up for consideration. House bill 4293 regarding timely payments of royalties which would have major penalties for late payments. House Bill 4850 that removes the sunset law clause from oil and gas personal property. Tax House Bill 5045 that establish primacy over Class VI injection wells as well as underground storage of Carbon Dioxide. House Bill 5268 which is regarding horizontal wells in enhanced oil recovery, along with a few other bills. We will keep you updated.

SOOGA BYLAWS: Short Preview

Current Regulations of the Southeastern Ohio Oil & Gas Association

ARTICLE I - NAME

The name of this organization (the "Association") shall be: SOUTHEASTERN OIL & GAS ASSOCIATION.

ARTICLE II - PURPOSE

The purpose of this organization shall be:

- To protect, promote, foster, and advance the common interest of those engaged in the oil and gas industry.
- To protect the oil and gas industry against unfair and unjust burdens and regulations.
- 3. To collect and disseminate pertinent data and information.
- 4. To foster safe industry operations and protection of the environment.
- To promote better exploration, drilling, completion, and operating practices.
- To conserve crude oil and natural gas and prevent waste thereof, including the conservation of the capital required to develop reserves and produce crude oil and natural gas.
- To protect the correlative rights of all those involved in industry operations.
- Generally, to do all things permitted by law and exercise all authority within the purpose stated in its articles or incidental thereto.

The Association is not organized for pecuniary profit and shall not declare dividends or other financial distribution to members. In the event of dissolution of the Association all assets shall be converted to cash and distributed to organizations of a charitable or educational nature.

ARTICLE III - MEMBERSHIP

SECTION 1. The Association shall have five classes of membership as follows:

- Producers
- 2. Contractors, Allied Industries, and Professionals
- 3. Associates
- 4. Royalty and Non-Operating Investors
- 5. Honorary
- 6. Student/Friend of the Industry

Membership in the Association is not transferrable and is non-assignable.

<u>SECTION 2.</u> Each individual holding membership shall pay dues in accordance with the classification of membership and rate assigned to such classification. The membership rate for each classification shall be determined by a majority vote of the Board of Trustees. Dues are payable directly to the Association annually in advance; or, as otherwise

The full update on Bylaws will be posted on our website at www.sooga.org.

This Update will be voted on at the Membership Meeting.
